

## NEW LIFT NOW OPEN

### Western Multi-Storey Car Park V

The lift in the Western Multi-Storey Car Park is now open.

The new lift will provide a more convenient shopping experience for both commercial and retail shoppers.

The commercial lift has a 4 tonne capacity, so is suitable for small to medium loads, in hand and push trolleys only.

The vehicle height restriction for the car park remains the same, so please check vehicle heights before entering the car park.

***NOTE: No pallets or pallet jacks should be used in the lift itself – all pallet loading should be confined to ground level.***

**Trolley return will be available on the upper floors of the car park.**

Please encourage your customers to use the upper levels of the multi-storey car park from this time.

**NEW LIFT  
NOW OPEN**
